

We make it **possible**

Metal Mesh Isolators

For the Most Challenging Environments

- » Recommended for applications requiring isolation across a wide temperature range (-130° F to +500° F).
- » Superior damping characteristics, Vibration isolation and high dynamic load capacity.
- » Resistant to aging. Infinite shelf life.
- » Impervious to ozone and chemicals.
- » Standard material is 300 series SST. Also available in other materials (ex: inconel or brass) to comply with environmental and conductivity specifications.
- » Available in a wide range of shapes and sizes. Unique non-symmetrical shapes created with custom dies.
